Deleting an Instance Checkpoint

This guide will cover Deleting an Instance Checkpoint

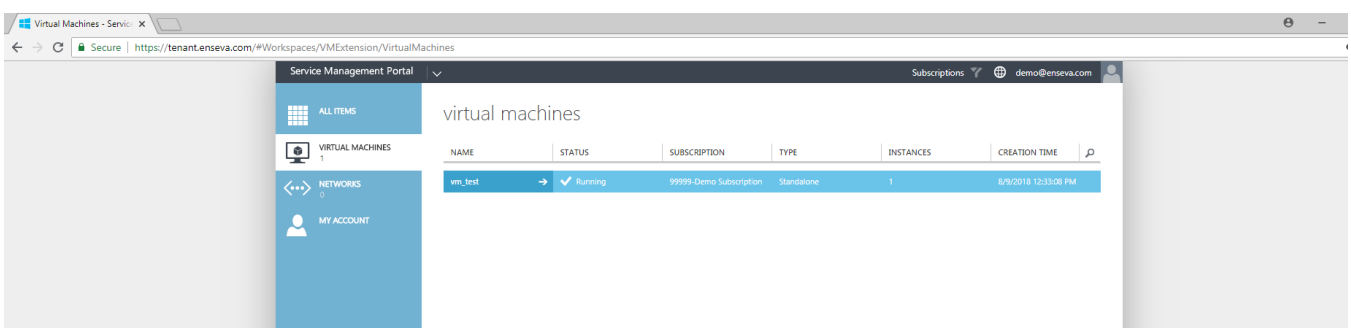

Deleting an Instance Checkpoint

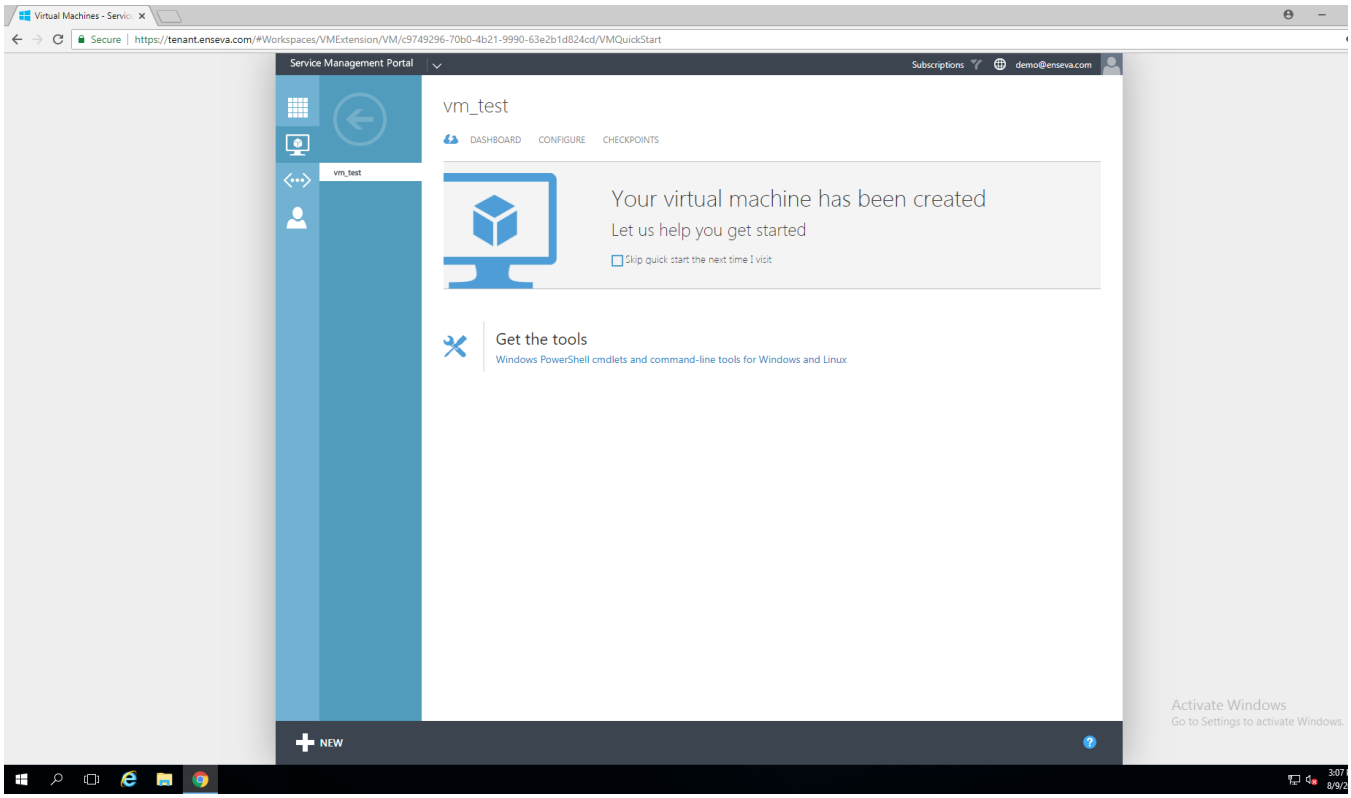

1. **Navigate to the Tenant Portal**

   Navigate to https://tenant.enseva.com and enter your login credentials, then sign into your account.
   For the purposes of this tutorial we already have a virtual machine with a friendly name of 'vm_test' that has a checkpoint created for it named 'checkpoint_one'

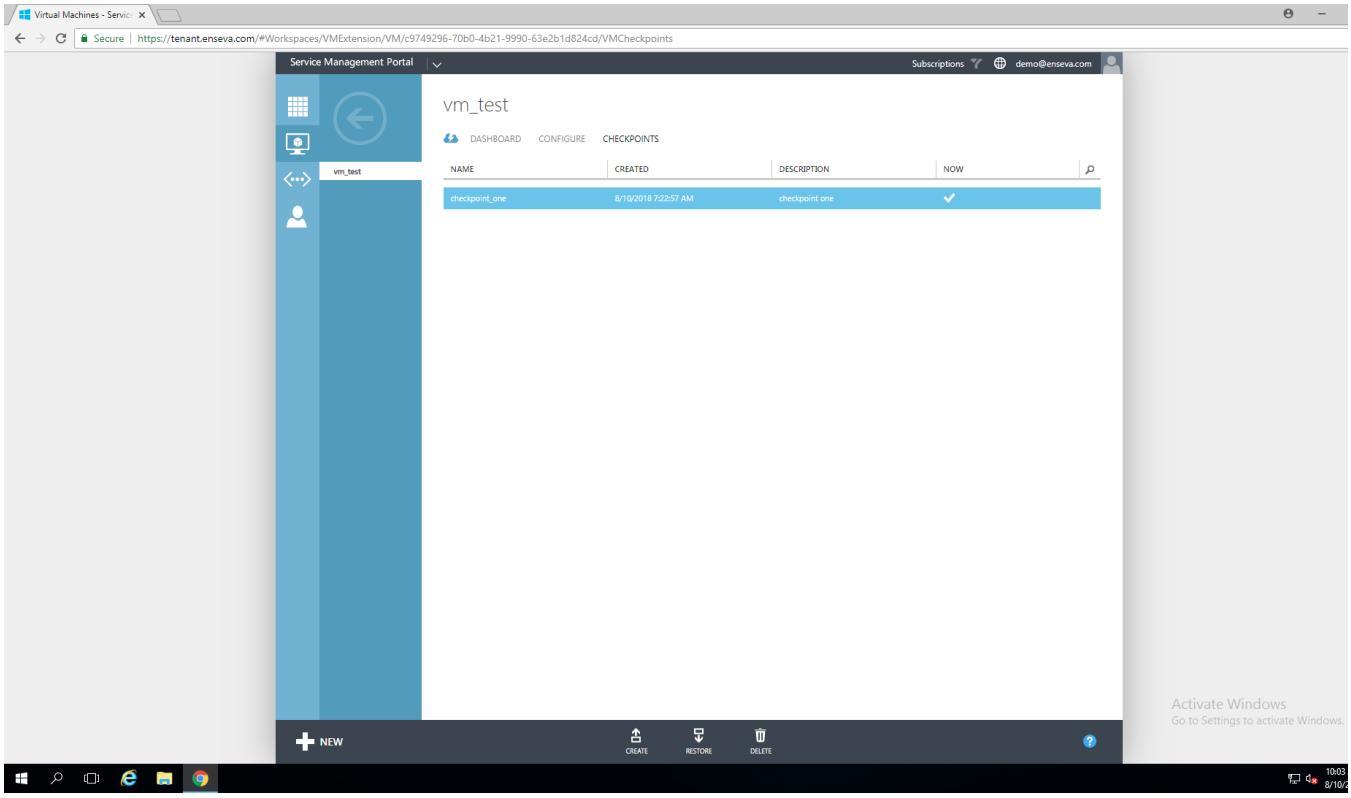

2. **Select Virtual Machine**
   Click on the virtual machine's name in which you would like to delete a checkpoint, this will bring you to the vm's dashboard.

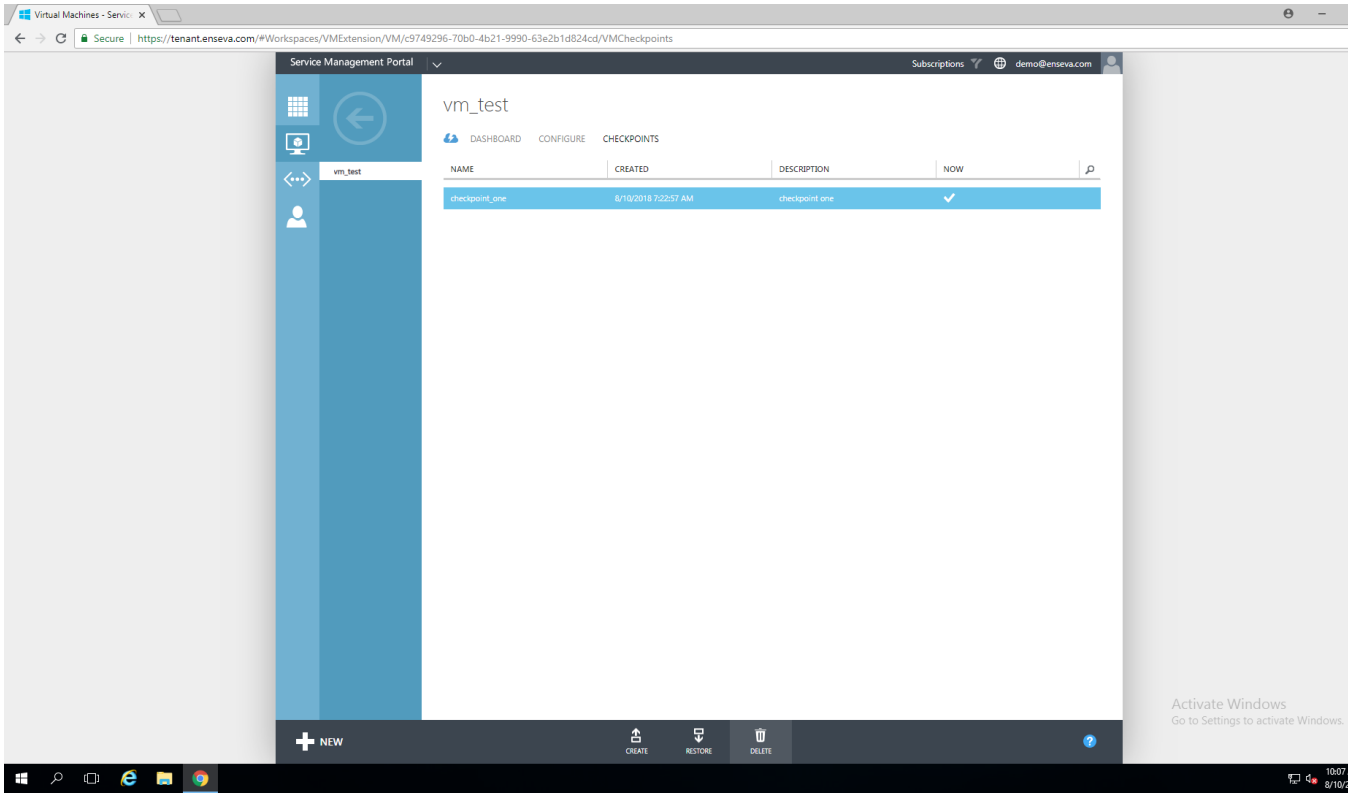

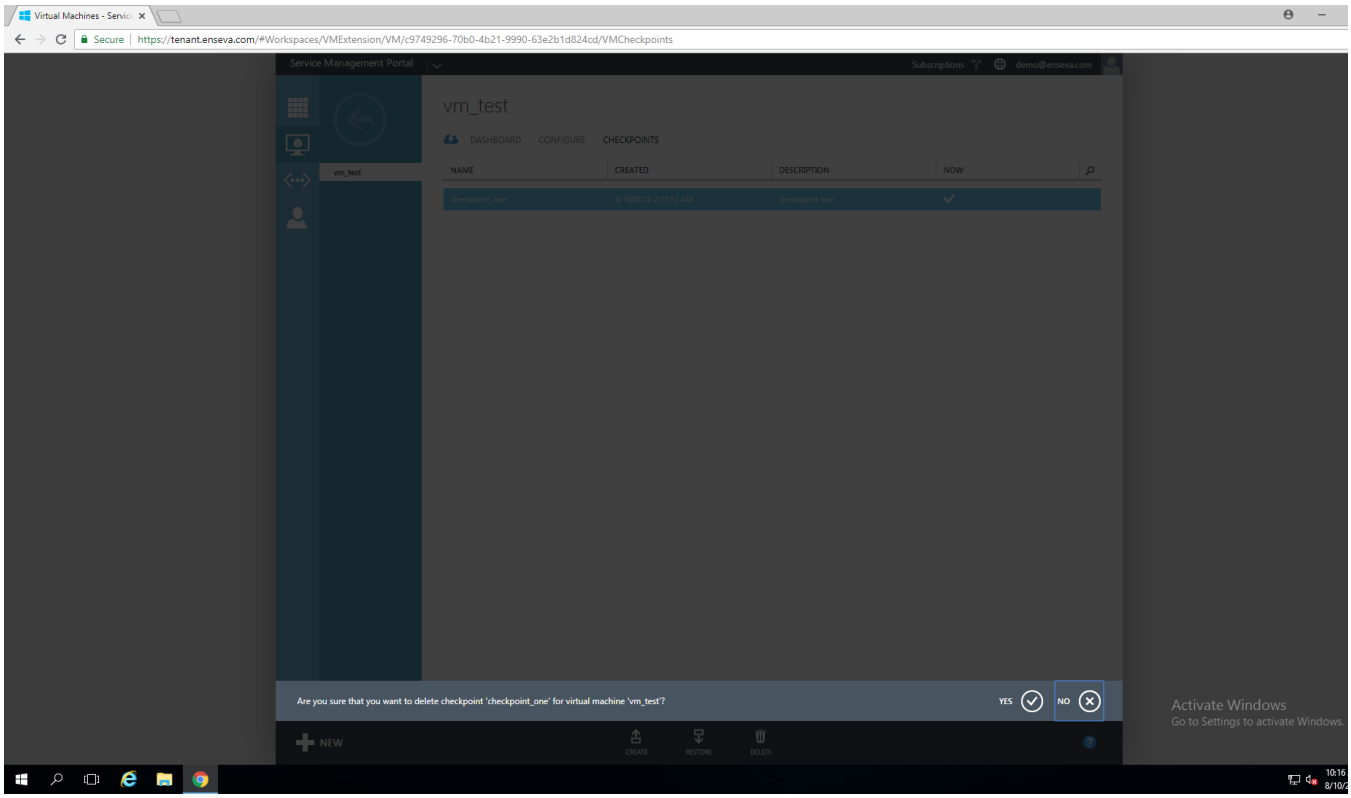

3. **Select Checkpoints**
   From the dashboard, select checkpoints near the top of the page, then select the checkpoint in which you would like to delete.

4. **Delete a Checkpoint**
   Near the bottom of the page, click the 'Delete' button.

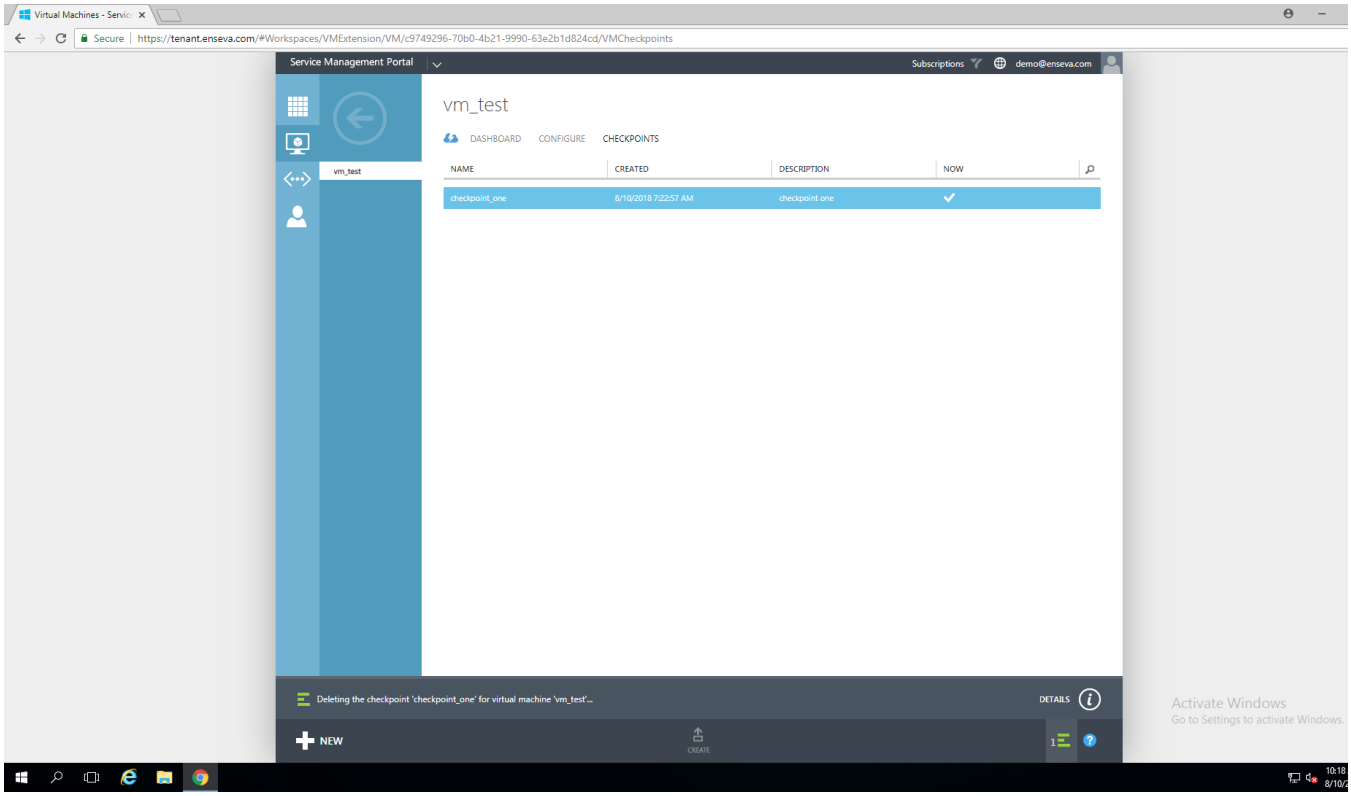

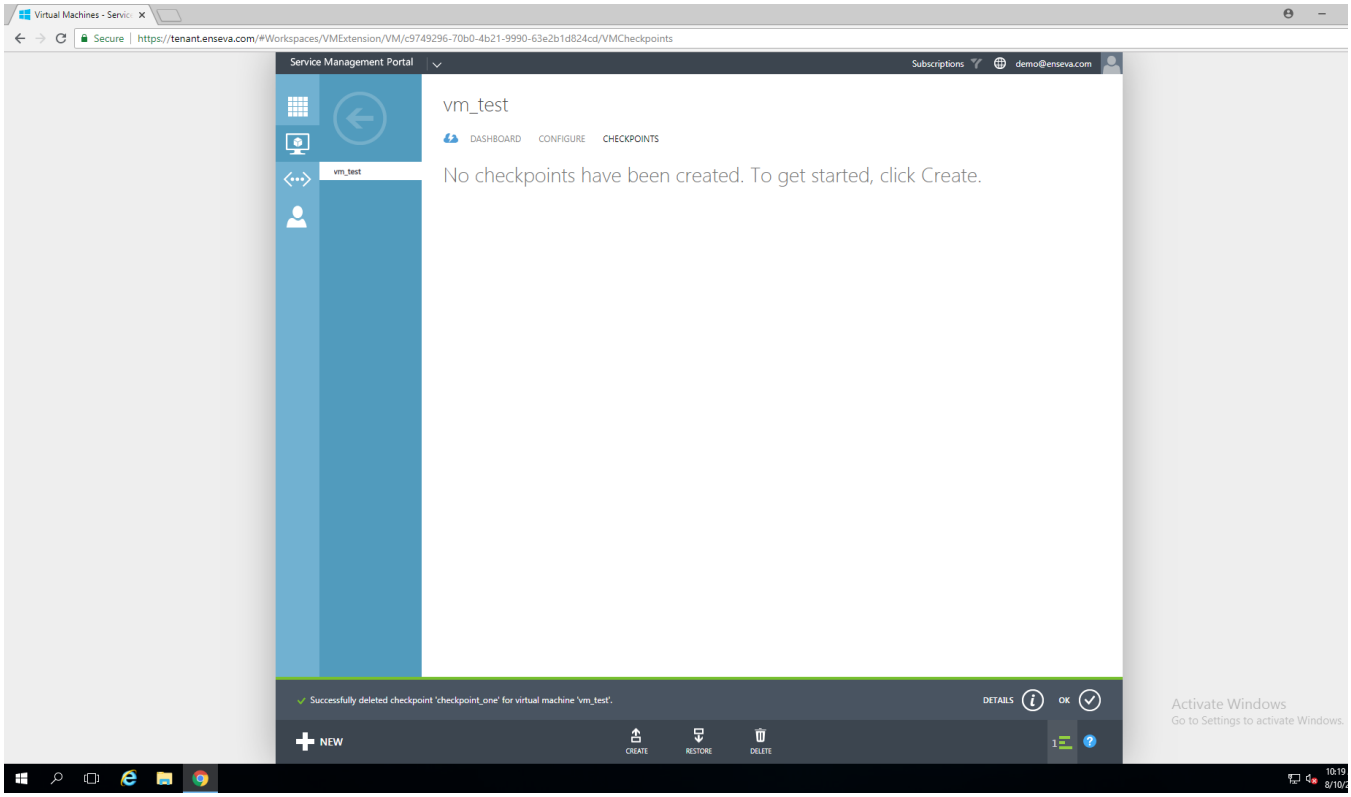

5. **Confirm Selection**
   A pop-up bar will appear towards the bottom of the screen asking you to confirm your decision, select 'Yes'

6. **Verify Removal**
   A pop-up bar towards the bottom of the screen will indicate that a checkpoint is being deleted, wait for this operation to complete.

   When the operation has finished you will notice the message within the bottom pop-up bar change to Successfully deleted checkpoint 'checkpoint_name' for virtual machine 'Virtual_machine'
